Brief description of duties:

- Full Duty (8 Hours)
- Explanation to patient about the examination.
- Perform MRI, CT scan and radiographic examinations.
- Maintain records, inventory, and equipment for area responsibly
- Every day I do 20 – 25 MRI , 25 – 30 CT

Skills, abilities and experience

I have always been interested in the field of radiography. I have a strong passion for the subject with all the necessary skills required . As this is a vast field with scope of continuous progress I have always been very keen to learn new procedures and skills. As this field requires continuous dedication even under strenuous environment , I feel that I possess all the necessary qualities to work effectively under such conditions.

The patients including their companions appear very comfortable and satisfied during and after the radiographic procedures which shows that I am very empathetic towards them and that I also possess very good communication as well as patient handling skills. The doctors and co-workers from my department as well as from other departments seem very comfortable to communicate with me.

During my **14 years of experiences** I have done a lot of **X-rays, CT scans , MRI and PETCT scans** . I am currently working as a **head technician**.

I possess all the skills and experiences that is suitable for the post and I am pretty confident that I am one of the best candidates for this role. The skills and experiences I possess till date can be summarized in the following points :

- I always check patient prescription for the physician's order prior to the exam.
- I can perform all the radiological examinations with good knowledge in special studies like **MRCP, Spectroscopy, DTI, Perfusion, Prostate , Female pelvis, Breast, Defecography Sleep apnea, dynamic studys, CSF Flow, urography, Fistulography, Enterography, Cisternography, All Angiograms, venograms and all PETCT procedures.**
- Communication: (1) I communicate pertinent clinical information to appropriate members of the patient care team & department personnel. (2) Keep patient / family appraised / updated. (3) Establish and maintain strong positive communication with patient and families.
- Maintain records, inventory, and equipment for area responsibly.
- Demonstrate clinical imaging procedures to students and new staff members.
- Select and operate radiologic equipments, selecting proper technical factors on an individual patient basis, selects proper film size or given exam, ensures proper identification and collimation, using appropriate markers, develops film as required.
- Handle equipment in a responsible, professional manner.
- Assist physician during angiographic procedures, working with specialized equipment. Assists physicians in performance of examinations by programming injectors, administering opaque media, holding and turning patients, assisting in sterile procedures.

- Maintain equipment and room to sanitary standards between patients (injectors, table tops, floors).
- Demonstrate competence in computers and information processing, computer applications, image capture, display and storage including PACS.

If given the opportunity to work with your radiology team as a technologist, I am assured that it will further enhance my carrier in the field.
