### **OBJECTIVE**

To build a long term career in technological services through innovation and technical expertise with opportunities for career growth to enhance professional skills in a dynamic workplace and to contribute effectively towards the growth of the organization.

### **PROJECT DETAILS**

Title : Space vector PWM control synthesis for a H – Bridge drive in Electric vehicles

Description : In our project H bridge inverter is used and to the inverter circuit dc supply is given and pic microcontroller 16F877A is used to produce the trigger pulse and the drive FAN7392M and the diode IN4007 combined used to drive the H bridge inverter and with the help of the pulse the inverter is triggered by which dc supply is converted into ac supply and then the sinusoidal wave form is obtained which in turn is connected to the permanent magnet synchronous motor.

### **FIELD OF INTEREST**
