## EXPERIENCE

ASSOCIATE SOFTWARE DEVELOPER

### SOLVERINES TECHNOLOGY SOLUTIONS

SEP 2020 - MAY 2021 9 MONTHS

**PROJECTS:**

**Back Office**

- This application is used to maintain dynamic themes and page styling and dynamic dashboard images which can be viewed and maintained only by Super Admin. Maintain and access the logs of users with respect to each tenant.

**Track and Trace Tool**

- This application is used to track and trace the location, status of shipments for logistics and freight services organizations.
- Both the applications were developed in Outsystems 10 & 11 (Web, Mobile) and they are Multi-Tenant.
- Maintain and manage tenants, roles, users, screen access for each tenant, and screen-wise user access management for organizations.
- The application will interact with SSO (IDP and Microsoft 365) for authentication purposes.
- The Business logic and the web screens to manage Employees and Customers are reusable modules.
- It has customizable UI widgets and uses Outsystems 4-layer canvas architecture.
