### **PROJECT**

#### **PAYROLL MANAGEMENT SYSTEM – AN APPLICATION TO CALCULATE THE SALARY**

##### **ABSTRACT:**

In EXISTING SYSTEM destroying black money is not possible, because of the people who do not pay the correct tax amounts. The current issue in India is fake money and black money. In the PROPOSED SYSTEM, first investigate the classic tax evasion cases, and employ a graph-based method to characterize their property that describes two suspicious relationship trails with a same antecedent node behind an Interest Affiliated Transaction(IAT). In MODIFICATION PROCESS, NFC tag (Value, Serial Number & Expiry date) is attached with the Currency. 1. Money Counting Device is installed in every office for billing purpose. 2. For Mobile users NFC Reader is attached with the Android Phone. In both these two cases Currency details are dynamically transferred to the RBI Server. 3. Implementation of QR code based amount transaction via Android Application. 4. Implementing cashless transaction using card. Using all of the above four methodologies RBI can easily track all the transactions (Income & Expenditure) made by every user. SMS Alert is done for currency expiry.
