Technical Skills:

- Programming Skills : C
- Operating Systems : Windows 10
- Languages Known : Telugu, English
- Office stuff : MS Office

Project details:

Project : Hybrid driver safety, vigilance and security System for vehicle

Role : As a team number work on a GSM Technology

Team size : 5

Project description:

The project is aimed to design provide the safety to the driver and vehicles. In this project In this project initially we can switch on the engine of the vehicle. While running the vehicle if the driver gets sleep automatically the vehicle caused by the accident. And also if , the

driver can drinking while running the vehicle same thing will be happen to the vehicle. For achieving this we can use IR sensor, for detecting the sleepiness of the driver and alcohol sensor is used for detecting the drinking condition of the driver and we checking seatbelt connection. If any one of the sensor will be activated he will gets message to owner through GSM and also automatically the engine gets OFF and information display on LCD . By this we can achieve the safety. This project uses regulated 5V, 500mA power supply. Bridge type full wave rectifier is used to rectify the AC output of secondary of 230/12V step down transformer. This project is useful in maintaining the temperature mainly in Surgeries.

Strengths:

- Hard working and dedication towards work.
- Self-Motivation.

Co-Curricular Activities:

- Actively participated in QUIZ competition on the occasion of CIT.
- Presented a PPT on the occasion of VIVA.

Extra Curricular Activities:

- Participated in National Integration Walk.
- Active member of Dance club.

Personal Information:

Name	:	B. Lakshmi Priya
Father's Name	:	B. Chimpiraiah
Mather's Name	:	B. Madhavi Latha
Gender	:	Female.
