PROJECT EXPERIENCE:**Synthesis and Spectral Characterization of New Schiff's Bases in Aqueous Medium**

Description: Schiff's bases were prepared by a relatively mild, high yielding efficient synthetic protocol for the condensation reaction of 2-amino 4-nitro phenol with various aldehydes in water at 70-60⁰C. Ultrasonication resulted in shorter reaction times (4-15 min) with excellent yields (80-88%). The title compounds were synthesized from 2-amino 4-nitrophenol by reacting with various substituted aromatic aldehydes in aqueous medium under ultrasonication.
