

NIXON LAZAR

Email Id: mail2nixenn@gmail.com

Mob No: +91 9514360421

+91 8056452387

Skype: Nixon Lazar

❖ OBJECTIVE

- ❖ Seeking for a Career as a **COMMISSIONING/PRODUCTION OPERATOR** with **11+ years** of experience in Oil and Gas Field.

❖ EDUCATION

- ❖ Diploma in **MECHANICAL ENGINEERING _ 2003**

❖ SPECIAL COURSE TRAINING

- ❖ Elementary First Aid
❖ Personal Survival Techniques
❖ Personal Safety Social Responsibilities
❖ Fire Prevention & Fire Fighting
❖ Helicopter Under Water Escape Training(HUET)

❖ PERSONAL DETAILS

- ❖ Father's Name : lazar
❖ Date of Birth : 29/11/1981
❖ Nationality : Indian
❖ Marital status : Single
❖ Passport No : P1640157

❖ Date of Expiry : 19/07/2026

WORK EXPERIENCE

WELLTEST PRODUCTION OPERATOR **AUG -2018 to JUN 2021**

QP,DUKHAN,Qatar

- Monitor recording instruments, flow meters, Panel lights, or other indicators and listen for warning signals, to verify confirmly of process conditions.
- Record operating data, such as pressures, flow rates, and temperatures on equipment.
- Regulate or shutdown equipment during emergency situations, as directed by supervisory personnel.
- Patrol work areas to ensure that solutions in tanks or vessels are not in danger of overflowing.
- Turn valves to regulate flow of products or byproducts through separators, line heaters, or chocking manifolds.
- Gauge tank levels, using calibrated rods.
- Repair or replace damaged equipments.

Patrlol work areas to ensurenth

COMMISSIONING OPERATOR

AUG -2015 to DEC 2016

SK.ENG, KOC, Kuwait

- Prepare all pre-commissioning, commissioning and startup operation documents (test packs, marked up P00000000&ID, punch list, flushing, blowing, Rupture card board blasting, mechanical isolation, lock out tag out LOTO system, Gross Air leak test, Nitrogen Helium leak test, Nitrogen purging and start up)
- Checking of vessel, column internal inspection.

- Column valve tray plates erecting level, water height down comer clearance, valve free moment & toper fighting of tray decks.
- Checking FG system, deluge fire water system.
- Making of punch point list rectification of the point in co-ordination with maintenance.
- Inspection equipment in association with inspection personal caring out flushing, blowing, drying, nitrogen purging steam blowing & chemical cleaning of various pipelines.
- Caring out trails runs of all the rotary equipment.
- Inspecting all the utility and their safe commissioning.
- Caring out leak test with liquid nitrogen of various sections.
- Lining up the plant for safe start up.
- Commissioning of fire water system, flare system, underground drains systems, HP/LP fuel gas system, and chemical loading procedure

PRODUCTION OPERATOR

MAY 2012 to MAY 2015

SUDD, Sudan

- Routine Monitoring the Plant with control room in order to take a corrective action.
- Monitoring & controlling all the Process Parameter (Pressure, Temp, flow & Level).
- Collecting Routine samples and submitting to laboratory.

- Carrying Isolation/De-Isolation and Bypassing as per the Control room instruction. Safe start-up & Shut down the plant.
- Operating the rotating equipment's (Pumps, Compressors) smoothly and safely and Updating Log books.
- Following all kind of (PTW) work permit system, strictly and carefully.
- Maintaining radio communication with Field and Control Room Operators.
- Operating First & Second Stage Separators (3 Phase), Crude to Crude Exchangers, Crude/Hot Oil Exchangers, Electrostatic Dehydrators, Crude De-salter & Hot Oil Boilers.
- Gas Dehydration & Regeneration Unit, Contactors, Lean Rich Exchangers, Re boilers, Filters, Glycol Pumps, Surge tank, & Stripper Operations and Compressors operation.
- Operating Produced Water Tank, Skim Oil Tank, Gas Boot, Open Drain and Close Drain, Flare knock out Drum, and its related pumps.
- Handling the Crude Oil Storage tanks & Operating Crude Oil Export Pumps.
- Metering skid and Pipeline Exporting operations.
- Operating Utility Plants (Instrument Air Compressors, Fire water pumps etc.).
- Routine Patrolling and Inspection of wellhead for leaks and abnormalities.
- Pig launching and receiving activities.

COMMISSIONING OPERATOR

AUG-2010 to DEC - 2011

DALIM, Saudi Arabiya

- Handling hazardous hydro carbons like Ethane Cracker Unit (ECU), Petroleum, Natural gas, LNG, Propane, O-Xylene, Phthalic anhydride, Furnace Oil, Diesel, LPG, (Molten salt, Hydrazine, Morpholine) etc.
- Handling compressor, electric heater, drum, recon denser, blower, pumps, filters, static mixer.
- Pre-commissioning activities like air blowing, cardboard blasting and flushing of lines. Steam blowing of Very High-pressure steam, Medium pressure steam, Low pressure steam and Low Low-pressure steam lines, nitrogen blanketing, preparing the system for pressure test, leak test.
- Active Team Member for Pre-commissioning & commissioning of new Projects.
- Executing Trunk Line Pigging of Production fluid and Injection Water Pipelines.
- Gas Dehydration unit (MEG): pumping unit, Natural gas compressors, Salt water disposal wells and pumps, direct inject water separators, High and low-pressure separators.
- Handling of Intermediate pressure separators, Heater Treaters Gas and Electric, Line heaters, Gas scrubbers, Flares, Gas and condensate separation by Slug Catcher and inlet separators.
- Handling Gas De-hydration with TED and its regeneration system and Gas De-hydration with Molecular Sieves Adsorption and regeneration process.

COMMISSIONING OPERATOR

NOV-2007 to NOV 2009

ISCO, Kuwait

- Involved with client and sub-contractors line walk down and lock out tag out LOTO system,
- Involved with client and sub-contractors pre-commissioning check sheet signed document activities etc....
- Monitoring pre-commissioning team lineup activities and crossed check their lineup activities (Test limitation points should be closed condition, all inline manual and activated valves should be open condition, pressures gauges and pressure indication transmitters, temperature gauge and temperature indication transmitters

should be lineup, all vent and drain valves should be closed condition, temperature gauge and temperature indication transmitters should be lineup.

- Monitoring process unit operations & trouble shooting with a focus on safety, environment and profitability.
- Daily meeting for commissioning and operation activities development.

COMMISSIONING OPERATOR

JAN -2007 to JULY - 2007

CRAIN ENERGY, Rajasthan

- Attend plant emergencies. Monitoring of plant parameters for efficient and optimum operation of plant Execution/ monitoring of plant start-ups and shutdown.
- Safe chemical handling and practices with proper PPE.
- Maintaining Weekly & Monthly Reports in Operation Point of View, preparation of Startup and Shutdown check lists.
- Capability of Taking Individual Charge in all respective areas in Utility also with high confidential performance.
- Continuously monitor the process parameters to avoid the unwanted downtime
- Work permit system handling like HOT WORK, COLD WORK, HIGHT WORK & CONFINED SPACE
- Having Experience in Tank form operation and utilities.
- Identify, plan and safely execute all maintenance jobs to monitor and record them to reduce the turndown time, increase the reliability of running equipment's and ensure availability of standby ones.

PRODUCTION OPERATOR

MAR -2004 to OCT 2006

ONGC Mumbai Offshore

- Co-operating with mechanical team while changing the gland packing in stuffing box.
- Checking PCP drive head equipment's (stuffing box, gear box, belt, breaking fluid, PCP motor, motor pulley, driven pulley, sucker rod).
- Operation of SSV and Choke Manifold, three phase Separator and it's all controlling system.
- SUCESSFULLY CARRIED OUT PIG LAUNCHING & RECEIVING OPERATIONS ON OIL AND GAS FLOW LINE FROM WELLHEADS & OIL AND GAS EXPORT LINES
- Sampling and it's all analyzing like Specific Gravity (SG) of Oil & Gas and Water through various Instruments. Salinity, Calculate the Oil, Gas, Water and GOR.
- Provide co-ordination during startup & shut down activities and wellhead operation.
- Regular maintenance & pressure testing of all equipment's.
