Software Engineer (Mainframe Developer)

Mysore
November 2010 to January 2014

Assignments

1. RID PEST (Pest Control Management) **(Singapore)**

Client :RIDPEST Sdn. Bhd.

This project consists of mainly six modules, Such as Security Module, Human Resource Module, Customer Relationship Management Module, Operations Module, Procurement Module,Accounts Module.

- Perform Web based Testing,API Testing and Mobile testing.
- Worked in creating Automation framework from scratch, Automation scripts, Manual Test, Test case Design, Test case Review, Test Plan, Test Documentation
- Used Java/Selenium WebDriver/ Eclipse/ TestNG
- Create Bug report
- As Scrum Master I guided in removing impediments, facilitating discussion, decision making, conflict resolution and supported Product owner
- Conducted Daily Scrum, Sprint Planning, Grooming, Sprint Review, Sprint Retrospective.

2. HACKNEY

Client: Thesolesupplier (UK) <https://thesolesupplier.co.uk/>

Price aggregator website for shoes To compare the shoes we need some defined fields like product name, style code, price, stock, description about product images of the product. Here style code should be unique, using style code only we can filter the product & we can aggregate with all retailers under TSS

Technologies: Python,MongoDB, kafka,Algolia(elasticsearch)ETL,API, POWER BI

- Perform Data based Testing and ETL Testing
- Worked in creating Test case Design, Test case Review, Test Plan, Test Documentation
- Create Bug report
- As Scrum Master I guided in removing impediments, facilitating discussion, decision making, conflict resolution and supported Product owner
- Conducted Daily Scrum, Sprint Planning, Grooming, Sprint Review, Sprint Retrospective.
- CheckingPOWERBI,Kibana dashboard and Algolia search index ondaily basics and comparing data with database.

- Worked as a test lead. In this period I was responsible for managing a team of 9 resources, assigning them the task daily, participating in the Work product review to obtain signoffs on the test case, reviewing the deliverables (Requirement Traceability Matrix, Test plan, and daily status report) to the project management
- Strong Experience in Maintaining JIRA and MONDAY.com .

3.EASY CLINIC

Easy clinic is a web based application where the common people struggle to consult with concern doctors to cure their illness. In this web Application contains three login they are “Admin login, Doctor login and User login .The main motive of this project is to book an appointment and make the common people to interact with concern doctor for consulting about their illness.

4.PACE(Planning is About the Customer Experience) Client : Macy's <http://www.macys.com>

PACE includes the seamless integration of a customer driven demand forecast (using My Macys Portal) which provides an intelligent starting place for Preseason planning and in addition eliminates time and effort for the planner and buyer during the In-season planning process. PACE is a role based automated seasonal merchandise planning application. Various planning roles within the organization identify the levels at which planning occurs and the time period with which each level of planning should take place. Each role may have a bottom-up process and/or a top-down process. PACE uses the Retek Predictive Application Server (RPAS) which is a third party application originally developed by Retek and purchased by Oracle. It runs on AIX UNIX and uses korn shell scripts developed by MST which calls the Retek API for batch processing.

5.Credit Reissue Automation

Client : Macy's <http://www.macys.com>

General term to describe any process in which existing customers will be sent new Macy's or Bloomingdale's credit cards. There are Types of Reissues like Process to reissue non-expiring accounts with an upgraded VIP card in hopes that the customer will shop more often, Process to reissue expiring and non-expiring accounts for all Macy's divisions. Process to reissue expiring accounts for Bloomingdale's and Process to reissue expiring accounts for a single retail division

- Creating the Technical Specification
- Modifying the program as per the requirement
- Redesigning remote update process for close codes and flags
- Sending the updates to Onsite and getting the clarifications from the Onsite coordinator.
- Testing the program through ICM, Xpeditior and Intertest Resolving Bugs during SIT/UAT phase

Achievements

- Delivered Project before scheduled time
- Implemented ideas for making effective and productive team.
- Gave idea to build a tool which can automate the HRM process
