## Project Experience:

### Project1:

**Project Domain:** Banking

**Project Name:** Scotia-CAN-Core Banking-QA-TM

**Title:** ALSCOM (JG)

**Environment** : UAT, IST

**Role:** SME, Junior Business Analyst and Functional Tester

**Team Size:** 3

**Duration:** Oct 2015 to Feb 2017 and May 2017 to till date

**Testing Tool** : ALSCOM (Automotive Lending Solutions Comprehensive Origination Manager)

**Portal:** Dealer track (DTN) and Route One (R1)

### Project Description:

The DFC Workflow Validation/Funding define the system enhancements required to allow the DFC's the ability to Validate Funding documents online and fund the application. A new message will be received from the portal once dealer decides the application contains all of the accurate funding details. This new message, referred to 'Contract Message', will allow the system to automatically review the application details. New business rules will validate that the application data sent from the portal at funding matches the adjudicated data within set guidelines, meets Scotia bank's policies and program requirements, and it will allow the system

to automatically calculate the dealer proceeds for Funding. Once the ‘Contract Message’ has been validated, this data will be used to validate the received Funding documents.

**Roles and Responsibilities:**

- Implemented test metrics to communicate status of testing and error correction.
- Working on Agile Methodology.
- Provided Demo to product owner at every sprint end.
- Involved in Sprint Planning, Grooming session and Daily Standup calls.
