- Microsoft Office

Vocational Training & Workshop

Internship and Project Details:

Project Details	Period of work	Brief Summary
Heart Disease identification Method using Machine Learning Classification in E-Healthcare	Jan 2021 – Apr2021	Heart disease is one of the most signicant causes of mortality in the world today. Prediction of cardiovascular disease is a critical challenge in the area of clinical data analysis. Machine learning (ML) has been shown to be effective in assisting in making decisions and predictions from the large quantity of data produced by the healthcare industry.We have also seen ML techniques being used in recent activities.
Sensor based home automation	Jan 2019-Apr2019	The conventional design of home security systems typically monitors only the property and lacks physical control aspects of the house itself. Also, the term security is not well defined because there is a time delay between the alarm system going on and actual arrival of the security personnel
Java	Aug 2021-Sep 2021	Variables,Object -oriented java,conditionals and control flow Array and array lists ,loops complete in codecademy
SQL	Aug 2021-Sep 2021	Manipulation,queries,aggregate functions and multiple Tables

Achievements and Value Adds

COURSE COMPLETION:

- **Java course completed in codecademy**
