MINI PROJECT:

- **Steganography:**
  Description: This is a technique of hiding information within another information. By using the technique of encryption and decryption a text file is encrypted with an image file at the user side and the file is transformed as an image file to the receiver. At the receiver side the image file is decrypted to view the text file.
- **Mini Dictionary using Data structure:**
  Description: This project enables the user to get the meaning of a word which is stored in a binary search tree. The backend is used as notepad which holds all the words and their respective meanings. The tree efficiently generates the meaning of a word which is searched by the user.
