- Industrial visit at GODWILL ENERGY PRODUCTS PVT.LTD in Vellore on 02.08.2019.

ACCADEMIC PROJECT

ADVANCE VOTING MACHINE USING ARDUINO

The internet of things (IOT) is a recent technology where electronic devices, software, sensors, vehicles, home appliances are interconnected with networks to transfer data without human or computer interaction. The problem in the existing system is, the electronic voting machines do not have any recent security measures by which the voter can verify their identity before casting the vote due to false voters can cast numerous duplicate or fake votes. So, the proposed system is implemented using RFID and IOT (internet of things) to improvise the security mechanisms.

ACTIVITIES

- Participated in ZONAL LEVEL in KHOKHO during school days.
- Worked as EVENT COORDINATOR for A NON-TECHNICAL SYMPOSIUM conducted by ECE department during sixth semester.
